2023 ImPACT Internship Opportunities with Syngenta Seeds

We invite you to help us shape the future of agriculture. At Syngenta, we believe every employee has a role to play in safely feeding the world and taking care of our planet. To support that challenge, the Seeds Research Technology Development team is currently seeking a Research & Development intern in Research Triangle Park, NC. As an intern you will work as a member of the Technology Development team and shadow scientists while they conduct greenhouse, and laboratory research with emphasis in testing new technologies to enable breeding and production. You will also participate in data generation and summaries to evaluate new technologies and gene editing traits. We are open to the possibility of hosting up to 2 interns.
