

Position: ImPACT Intern-Scientific Services

MedThink SciCom is on the lookout for an enthusiastic, take-charge individual for our ImPACT Intern-Scientific Services position. It's a great way to dive into the world of healthcare communications and really make a difference. The Intern supports the Scientific Services team by executing a select set of projects. This position will learn all of the elements that make up a typical medical writer position and would also learn how to interact with the different agency functions in order to gain alignment. The Intern will also gain a significant understanding into the approach to project completion. Although content development may be familiar, the Intern will learn a critical skill – how to work within a team dynamic.

Our Values and Expectations of Future MedThinkers

- Take Ownership
- Help Colleagues Do Their Best
- Infuse Optimism and Fun
- Nurture Innovation
- Keep An Open Mind
- Exceed Expectations
- Respect Others

Position Requirements

Demonstrates behavior expected of a professional member of the organization, including but not limited to:

- The Intern will work on projects that add overall value to the organization
 - Past examples of projects interns have completed include building slide decks of examples of deidentified work to demonstrate MTSC's prior work in disease state education, publication planning, non-traditional audits, gap analyses, etc. Another example is building congress/journals grids with relevant information on oncology, rheumatology, dermatology, neurology(epilepsy), and managed care
- Participate in client and team meetings and trainings
 - Learn the process of working within a team dynamic
- Assist with project-related requests that would provide an understanding of content development in an agency setting
- Gain exposure to the life of a medical writer through interaction with other members of the scientific services team and the larger agency

Experience

- Experience in or willingness to learn about oncology, rare genetic diseases, neuroscience and/or inflammatory diseases
- Previous science writing or related experience ideal
- Demonstrated leadership experience
- High academic achievement

Availability

- Must be available at least 20 hours per week

Talent & Knack

The candidate should possess the following knowledge, skills and abilities:

- Completed a Bachelor's degree in Biology or other Life Sciences (required)
- Selected as a UNC ImPACT Intern within a year of defending your dissertation
- Strong organizational skills, attention to detail, and follow-through
- Excellent writing and oral communication skills
- Detail-oriented, able to take direction and execute
- Friendly and service-oriented
- Strong proficiency in informational searches
- Ability to manage numerous projects, requests, and responsibilities
- Excellent problem-solving skills
- Passion for discovery
