

Healthcare Pathway Program for Transfer Students - ImPACT Teaching Internship

Description: For the 2024-2025 cycle, the selected intern may start with course design/planning with the program's directors (Jean DeSaix, PhD and Laura Ott, PhD) who will serve as internship hosts and teaching mentors for this role. Start/end dates are negotiable, but ideally would start by early 2025 and finish by Aug 1, 2025. Time commitment is expected to be approximately 10 hours per week including face-to-face teaching in Summer Session 2 (June-July 2025), time spent in course design, summer teaching, and mentoring for a total of 160 hours. May include funded opportunities to attend and/or present at an education research conference. ImPACT funding or summer teaching stipends may be available, pending eligibility of the individual selected for this role. Role would include an appointment as summer instructor of record at UNC (for BIOL 185 or BIOL 290; see proposed [draft syllabus](#)). Optionally, additional modules on topics of interest relevant to the selected candidate may be developed and added to the course content. Deliverables may include: tailored syllabus, tailored modules of interest (optional), development of course materials, delivery of content to students, creation of assignments/assessments, development of rubrics, grading of student work, and completion/submission of course grading.

Program: Learn more about the [HPPTS Program](#), which serves C-STEP community college students interested in health professions who plan to transfer to UNC to complete their undergraduate degree. (Learn more about the [C-STEP Program](#)).

Preferences: Priority will be given to those with teaching interest and experience, which may include: training in course design or teaching pedagogy (e.g., CCST Program, UNC CIRTL, FuSE/TIBBS Summer Teaching Program); teaching experience (e.g., TA experience, K-12 teaching experience); and/or outreach experience (e.g., Morehead IMPACT Program, DNA Day/DNA DAY CONNECT, WinSPIRE).

Requirements: Enrolled doctoral student in the life sciences (e.g., Biology, BBSP, etc.) with teaching interest.

To apply or learn more: Please reach out to Jean DeSaix, PhD jdesaix@email.unc.edu and Laura Ott, PhD leott@email.unc.edu with a letter of interest and CV. Applications will be accepted on a rolling basis, and the position will be open until filled, but for full consideration apply by December 15, 2024. For best consideration, please send materials by December 1, 2024. Once selected, you will receive a Letter of Support from Jean and Laura as the candidate for the role and will submit that with a completed off-cycle ImPACT Internship Application (contact Rebekah Layton, PhD rlayton@unc.edu for more details on applying to ImPACT Teaching Internships).
